

PREPRUFE® PLUS

BELOW GROUND WATERPROOFING

PREPRUFE® Plus is the premium solution for high risk, critical and deep basements.

The PREPRUFE® Plus basement waterproofing membranes are specially designed to perform in critical applications and incorporate Advanced Bond Technology™, as well as the ZipLap™ double sided overlaps, to ensure fully adhered and long lasting performance.

Comprised of a robust HDPE film, pressure sensitive adhesive and smooth protective coating, the patented PREPRUFE® Plus system forms a permanent and persistent adhesive bond in a wide range of basement waterproofing applications in concrete structures.

Zero

LATERAL WATER MIGRATION

PREPRUFE® Plus system features

- PREPRUFE® has a proven, successful 30 year track record and global reach
- Advanced Bond Technology™ – enables membrane to fully bond to structural concrete to prevent lateral water migration
- PREPRUFE® Plus has a dual-adhesive ZipLap™, providing excellent lap adhesion in real job-site conditions
- Strong and durable HDPE films – resilient, flexible, time-tested waterproofing material
- Easy to install and straight forward detailing reduces errors and enhances productivity
- Provides resistance to soil contaminants such as methane, carbon dioxide, hydrocarbon vapors and radon gas
- Backed by end-to-end design and field support from dedicated sales and technical service teams

PREPRUFE® PLUS

BELOW GROUND WATERPROOFING

Why use PREPRUFE® Plus?

TRUSTED PREPRUFE® BRAND

GCP is the category creator, developing the first pre-applied, fully bonded membrane in the world. With decades of experience in the Middle East region delivering major critical and complex projects including airports, museums and stadiums, PREPRUFE® is a highly trusted brand in the market.

PROVEN PERFORMANCE

The PREPRUFE® systems are globally proven in some of the world's most critical applications. Independent testing and a 30 year track record has proven that the PREPRUFE® membrane can resist lateral water migration in extreme groundwater conditions, up to 70+ metres hydrostatic pressure.

EASY TO INSTALL

PREPRUFE® has been designed to make life easier on jobsites. It is cold-applied and requires no hot works, special permits, special equipment or power. It is a simple system consisting of a pre-applied membrane with adhesive laps, one tape and one liquid detailing membrane, delivering fast application on site.

TECHNICAL SUPPORT

GCP's waterproofing systems are backed by end-to-end design and field tech service to help the project stakeholders with multiple support points from product specification to streamlining installation.

PREPRUFE® Plus application areas

PREPRUFE® membranes are available for a diverse range of applications from low risk areas with intermittent water and vapor conditions to high risk applications deep below the water table. PREPRUFE® Plus can be used for even very critical structures and has a proven track record in:

AIRPORTS
EDUCATION
COMMERCIAL/RETAIL
MIXED USE
STADIUMS

INFRASTRUCTURE
RAILWAYS AND SUBWAYS
RESIDENTIAL
MUSEUMS
DATA CENTERS
